

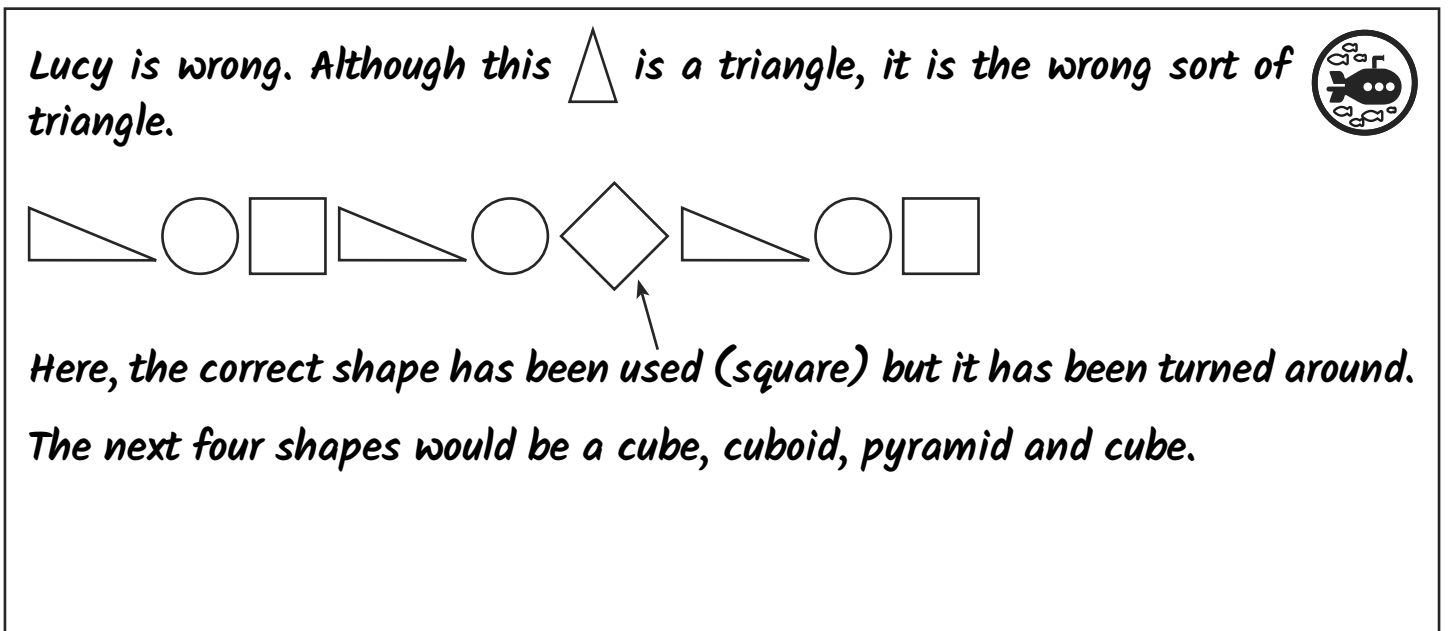

*Photographic evidence of repeating patterns children have created.*

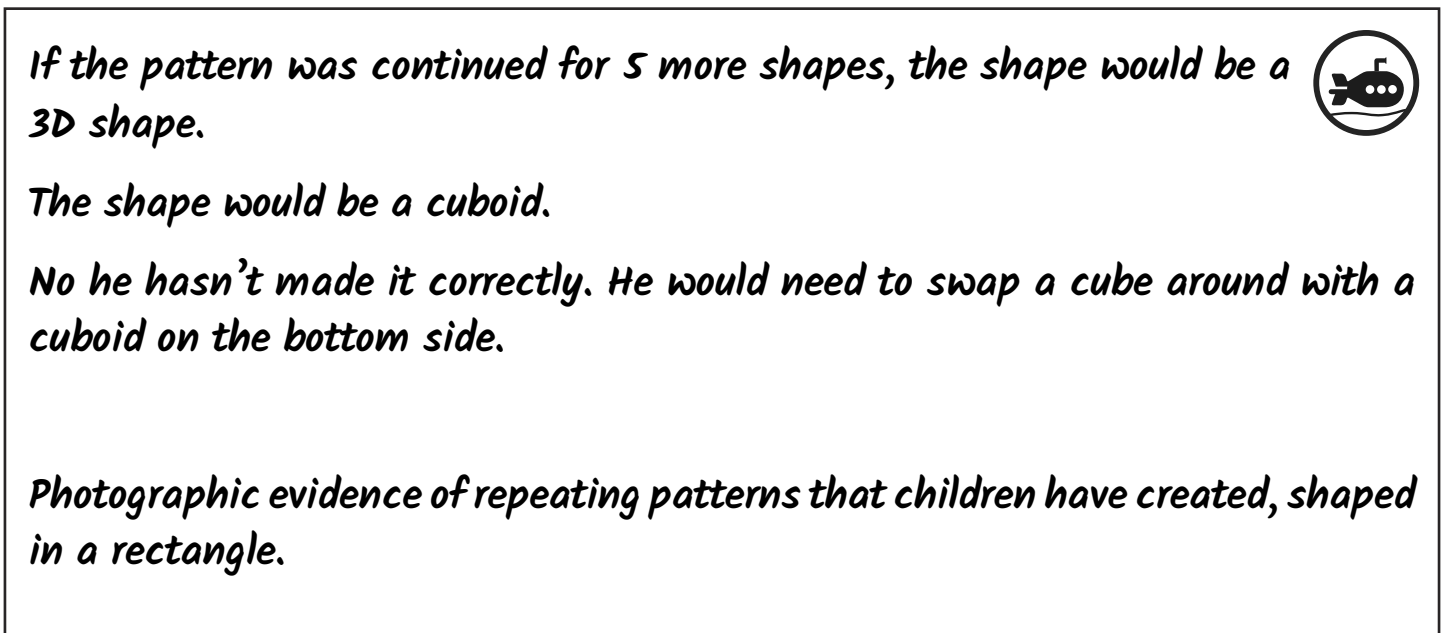

*Children make a different repeated pattern using a rectangle, a square and a circle.*

*Lucy is wrong. Although this  is a triangle, it is the wrong sort of triangle.*

*Here, the correct shape has been used (square) but it has been turned around.*

*The next four shapes would be a cube, cuboid, pyramid and cube.*

*If the pattern was continued for 5 more shapes, the shape would be a 3D shape.*

*The shape would be a cuboid.*

*No he hasn't made it correctly. He would need to swap a cube around with a cuboid on the bottom side.*

*Photographic evidence of repeating patterns that children have created, shaped in a rectangle.*
