

*A - three quarters full*

*B - full*

*C - a quarter full*

*D - half full*

*Container A is more full than container D.*

*Container C is less full than container A.*

*Sometimes. It is often true that the taller a container, the more it will hold. However, you could have a tall, narrow container that holds less than a short, wide container. The vase and the bucket in the question are an example of this.*

*It will take ten bottles to fill two pans.*

*The pot needs eight bottles to fill it to the top, so four bottles will fill it halfway.*
